

TransLock BTM3 FEATURES AND BENEFITS

FEATURE	BENEFIT
Auto Power Off	Saves power for optimum performance.
Electronic Load Cell	Utilises the latest in modern electronic and Mechanical technologies. Extremely Accurate measurements.
Hi-Res “G” Sensor	Gives very accurate acceleration readings that exceed government specifications.
Wireless Data Transmission	Direct interface with sensors means no more cumbersome cables.
Heavy Vehicle Testing Mode	Particularly useful when testing heavy and/or rigid vehicles. (Trucks, Buses, 4WD's ect)
“One Key Press” operation	User friendly, simple to operate.
HI-Speed Thermal Printer	Faster, Quieter, More Efficient printing than the traditional dot matrix printers. No need for the on going expenses of replacing printer ribbons.
Multiple Examiner ID	Ability to store up to nine different Examiner numbers saving time and data input.
Left & Right Hand Drive Option	Has the ability to test both Left and Right hand drive vehicles with ease. Simply mode change with the press of a button.
Fully Self Contained	Convenient, centralized unit enables multi-functional operation. Upgradeable to contain more functions such as Gas Emission and Sound testing. A real cost saver.
Super Twist LCD Display	2 line 80 character display. Better visibility at any angle in almost all testing conditions.
Accept/Cancel Function	Allows operator to cancel test readings without wasteful printing of unwanted results.
Secure Radio Communications	Wireless data transmitted through secure radio communications. No known interference that affects reliability and performance.
Dual Charging Systems	AC Rechargeable as standard with DC (12V Car) recharging option.
