We at **Translock** have advanced our Tint Meter into a stand-alone modular device that is sure to meet all your requirements for accurate and fast window tinting results. The **Translock** Tint Meter Series III is not only finding its way into many service stations Australia-wide, but is also proving useful in some interesting industrial applications.

At **Translock**, we also understand the harsh environment of the workshop, and as such, all our products are manufactured robust, whilst remaining light-weight and visually appealing.

If you require a more detailed account of the Tint Meter Series III, then contact us at **Translock** where, we develop "*complete solutions, not just answers!*"

Translock.
